### DETAILED ACTION

-This office action is in response to the amendment filed on 7/8/04. In this amendment, claims 2-6, 8-10, 12-14, 16-18 have been amended, claims 1, 7, 11, 15 have been canceled and claims 19-31 have been added. Overall, claims 2-6, 8-10, 12-14, 16-31 are pending in this application.

#### *Claim Rejections - 35 USC § 112*

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 26 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In claim 26 of the amendment filed on 7/8/04, the applicants added the claimed limitation *"said operating both the engine and the starter motor has both the engine and the starter motor applying a positive torque to a final drive coupled to the engine"* is considered new matter since the originally filed disclosure does not contain any support for the invention as now claimed.

#### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

***Claims 24, 25, 29 are rejected under 35 U.S.C. 102(b) as being anticipated by Kaiser et al. (US Patent 5,979,158).***

Regarding claims 24, 25, 29, Kaiser discloses a method for reducing exhaust emissions during cold start of an internal combustion engine, the engine being coupled to a starter motor and an exhaust gas treatment device (10) (see Figure 1), comprising:

supplying rotational energy to the engine at rest by the starter motor (see col. 3, lines 61-67); providing fuel to the engine when an engine rotational speed substantially exceeds an idle speed; and continuing to operate both the engine and the starter motor after fuel is provided to the engine (see col. 5, lines 29-34).

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

***Claim 26 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kaiser et al. (US Patent 5,979,158).***

Kaiser discloses all the claimed limitations as discussed in claim 24 above, however, fails to specifically disclose both the engine and the starter motor applying a positive torque to a final drive coupled to the engine when both the engine and the starter motor are operating.

However, when both the engine and the starter motor are operating, the fact that both the drive devices are coupled for rotation together clearly torque from both devices would be transferred to the final drive.

***Allowable Subject Matter***

Claims 2-6, 8-10, 12-14, 16-23 are allowed.

Claims 27, 28, 30, 31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

Applicant's arguments filed on 7/8/04 have been fully considered but they are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
